

IN THE LOOP

Latest updates from New Zealand's favourite transport group—Fairfax, Freight NZ, and Transcold.

A SUMMER SHOWSTOPPER: DOUCH TRANSPORT'S QUAD FAIRFAX SIGNATURE TRAILER

We're kicking off our summer edition with an exciting highlight, the stunning new Quad Fairfax Signature trailer, delivered to Douch Transport Ltd!

This trailer is more than just a mode of transport; it's a statement on the road. Designed with performance, reliability, and efficiency in mind, the Fairfax Signature is truly a showstopper.

This exceptional trailer combines sleek design with top-notch build quality. It's engineered to handle the demands of heavy-duty transport while providing unrivalled performance. Featuring a world-class Carrier refrigeration system expertly installed by Transcold, this unit ensures that temperature-sensitive cargo stays in perfect condition.

From the smooth curves of its exterior to the innovative features packed inside, the Quad Fairfax Signature is built for both form and function. It's a true testament to Fairfax's commitment to quality craftsmanship, pushing the boundaries of trailer performance while maintaining a striking presence on the road.

We're thrilled to see another premier Fairfax product out there, helping businesses like Douch Transport stay ahead in a competitive industry. This trailer is ready to take on thousands of kilometres with reliability and style, moving goods across the country with efficiency and ease.

Here's to many smooth and successful journeys ahead for Douch Transport Ltd!

ON THE ROAD AHEAD:

New Fairfax Premier Trailers Hit the Road for Kooner Transport!

Inside the TMC Show: Transcold, Fairfax & Freight Innovation

Fresh and Cool: Our Latest Custom Chiller Van Conversion

HAVE YOU HEARD?

TRANSCOLD, FAIRFAX & FREIGHTER TAKE ON THE TMC TRAILERS TRUCKING INDUSTRY SHOW

Our sales teams from Transcold, Fairfax, and Freighter headed to Christchurch for the TMC Trailers Trucking Industry Show, connecting with industry professionals and showcasing our latest products.

With a Fairfax Signature body, generously supplied by Big Chill, fitted with a Carrier refrigeration unit and a D'hollandia tail lift, our team had the perfect setup to highlight every aspect of truck and trailer solutions.

Held at Canterbury Agricultural Park, the event drew thousands of attendees over two action-packed days. Despite the chilly weather, our team had a fantastic time engaging with clients and potential customers.

Face-to-face conversations at industry events like this are invaluable. A big thanks to everyone who stopped by—see you at the next one!

FAIRFAX PREMIERE DELIVERED TO KOONER TRANSPORT

We've just completed two Fairfax Premier trailers for Harpreet Kooner, owner of Kooner Transport. These builds were outfitted with top-of-the-line refrigeration units: Carrier Supra 1250MT on the trucks and Vector HE19MT on the trailers, ensuring optimal performance and reliability for the long haul.

The customisation of these units reflects Kooner Transport's commitment to providing efficient and reliable services. With the superior quality of the Fairfax Premier models combined with the cutting-edge Carrier technology, these vehicles are equipped to handle demanding logistics requirements, ensuring smooth operations for years to come.

We're proud to deliver these high-performance vehicles and look forward to supporting Kooner Transport as they continue to grow their fleet.

DHINDSA TRANSPORT'S NEW FAIRFAX SIGNATURE UNIT

Another sleek Fairfax Signature unit has hit the roads, and this time, it's for Dhindsa Transport! Designed for performance and reliability, this top-tier unit is equipped with a world-class Carrier refrigeration system, expertly installed by Transcold, ensuring optimal cooling efficiency for temperature-sensitive cargo.

Built to withstand the demands of long-haul transport, this Fairfax Signature trailer combines sharp design with superior craftsmanship, delivering both style and functionality. Whether tackling cross-country routes or urban deliveries, it's ready to keep cargo fresh and operations running smoothly.

CAL ISUZU FREIGHTER CURTAINSIDE READY TO ROLL

Another top-quality Freighter 5 Axle Full Trailer is ready for collection! This brand-new dry freight curtain trailer, built for Cal Isuzu, is a perfect example of our commitment to durable, high-performance transport solutions.

With its clean, white curtains and sleek design, this trailer is a blank canvas, soon to be branded and put to work. Whether transporting goods across town or covering long-haul routes, this Freighter curtain trailer is built to perform under the toughest conditions.

CATCHING UP WITH JOHN STEVENS

As we settle into 2025, it's a great time to reflect on the progress we've made and the opportunities ahead.

Last year was a period of transformation for Fairfax and Freighter, with milestones like the launch of the Fairfax ZE setting a new benchmark for sustainable transport solutions. This achievement reflects the innovation, dedication, and expertise of our team.

We've also strengthened collaboration across our sites, bringing teams closer together to work more efficiently. Change is never without its challenges, but it's been inspiring to see everyone embrace new ways of working. This spirit of adaptability and teamwork is what keeps us moving forward.

Looking ahead, 2025 is shaping up to be another big year. With a strong foundation in place, we're focused on refining our operations, strengthening customer relationships, and tackling new opportunities with confidence. I have no doubt that, together, we'll continue to push boundaries and build on our success.

Thank you all for your commitment and hard work—I'm excited to see what we accomplish next!

SPOTLIGHT ON OUR LATEST BUILD FOR NORTH CHILL

We're thrilled to share that we've just wrapped up another fantastic build for our client, North Chill! This time, we delivered the Fairfax Premiere 4 Axle trailer, designed to meet their high standards for durability, capacity, and performance. Our team's expertise and attention to detail were evident throughout the build, and we're proud to see it ready for action.

The Fairfax Premiere 4 Axle trailer is the perfect fit for North Chill's needs, combining strength with flexibility to transport goods efficiently and safely.

This build showcases our commitment to quality and precision, ensuring that each project is tailored to meet specific client requirements. We appreciate North Chill's trust in our team, and we look forward to more successful collaborations in the future.

FAIRFAX DELIVERS HIGH-SPEC QUAD SEMI-TRAILER FOR K&T TRUCKING

The Fairfax team is proud to hand over a 15.1m quad semi-trailer to K&T Trucking.

The Fairfax team is proud to hand over a 15.1m quad semi-trailer to K&T Trucking. This high-spec trailer, loaded with intricate details and built for exceptional performance, will soon begin its service based in Christchurch.

Crafted with precision at the Freighter site, this trailer showcases the Fairfax commitment to delivering for our clients. Every element has been meticulously designed to meet the demands of K&T Trucking's operations, ensuring reliability and efficiency on the road.

Behind this success is the dedication of Fairfax's talented designers and engineers, whose expertise and attention to detail brought this vision to life.

ANOTHER QUALITY BUILD ROLLS OUT OF FAIRFAX

The team at Fairfax is proud to deliver another top-tier project for KAM Transport: a Scania fitted with an 8.5m Fairfax body, Carrier fridge and D'Hollandia tail lift.

Built to meet the highest standards, this truck is now ready to serve its new home base in Blenheim.

This build was a collaborative effort that highlights the strength of our partnerships and the expertise of our teams:

- Freightier Site: Crafted the durable and reliable Fairfax 8.5m body.
- Transcold Auckland: Installed the high-performance Carrier fridge.
- Fairfax: Fitted the D'Hollandia tail lift with precision.

Projects like these showcase the versatility and quality that Fairfax consistently delivers. Thank you to everyone involved for ensuring this build met our exacting standards and for supporting the smooth delivery of another outstanding vehicle to the transport industry.

THE FAIRFAX IFAC BODY: BUILT TO HANDLE WHAT COMES NEXT

When you're in the business of transport, you need more than just a vehicle - you need a solution you can count on, day after day. That's exactly what our latest bonded panel body build is designed to deliver.

It all starts with the materials. We've chosen high-density polyurethane insulation to keep your cargo at the perfect temperature, no matter the conditions outside. It's not just about

keeping things cool—it's about ensuring that what you're transporting stays exactly as it should, every mile of the journey.

But it doesn't stop there. The way we bond the panels together is what makes these bodies stand out. With epoxy bonding, the structure is not only rigid and durable but resistant to impact and corrosion, meaning you get a body that lasts, even in the toughest conditions.

What's more, we've designed these

bodies with flexibility in mind. Whether you need something compact for tight spaces or something larger for heavy-duty transport, our range of sizes and panel thicknesses can be tailored to suit your needs.

As we prepare to ramp up production, we're excited to offer you the chance to secure yours before the rush.

KEEPING COOL THIS SUMMER WITH TRANSCOLD

With Auckland experiencing scorching temperatures, our service teams in both Auckland and Christchurch have been working tirelessly to keep customers on the road. From urgent repairs to Carrier fridge installations, the teams have shown incredible dedication during this busy season. A huge thank you to everyone for their hard work, and to Pania for keeping up with all the processing behind the scenes!

CUSTOM CHILLER VAN CONVERSION

We recently wrapped up an exciting new project at Transcold – the conversion of a Mercedes 516 LWB van for Produce Pronto. This build is part of our ongoing commitment to providing tailored, high-quality solutions for refrigerated transport.

For this particular project, the van was fitted with insulated padded walls and PVC strip curtains at the rear. These flexible curtains are a great feature for making quick stops and maintaining temperature control while loading and unloading.

This isn't the first time we've worked on a chilled transport project like this. Recently, we've also converted Toyota, Renault, and Hyundai vans to meet similar needs. It's always interesting to see how different types of vans can be adapted to suit the unique requirements of our customers, and we're proud of the results that come from these conversions.

CATCHING UP WITH SHAIDEN LAMBERT

A new year brings new opportunities, and 2025 is already shaping up to be an exciting one for Transcold.

Last year, we focused on strengthening our team, rolling out new systems, and making strategic moves to position ourselves for the future. Those efforts are already paying off, and there's plenty more to come.

We've made big physical moves, with our Install team settling into the Fairfax building and our Christchurch crew relocating to Freighter. These changes reflect our ongoing investment in creating the best possible work environments. And with further expansion on the horizon, there's a lot to look forward to.

We're also excited to announce our new Hamilton Service Centre is coming soon, another step in strengthening our national network and providing even more responsive support for our North Island clients.

On the client side, David and I have been strengthening relationships through face-to-face meetings, reinforcing the trust that sets Transcold apart. We're excited to build on these connections and continue delivering the best in service and support.

We'll also be at Fieldays in June, keep an eye out for more details and come say hello if you're heading along.

Here's to a strong year ahead.

CHECK OUT OUR LATEST INSTALLS!

MARTIN BROWER REFRIGERATION & TAIL LIFT INSTALLATION

This build for Martin Brower features a Supra 1250MT refrigeration unit, offering precise cold chain control. Paired with a Dhollandia tail lift, this setup ensures efficient loading and unloading for seamless deliveries.

BIDFOOD FLEET UPGRADE

Bidfood's fleet just got even stronger with the installation of a brand-new Supra refrigeration unit. Engineered for maximum efficiency, this system ensures consistent temperature control, keeping food products in peak condition throughout their journey. With this latest addition, Bidfood continues to raise the bar in food distribution.

TASMAN REFRIGERATION & TAIL LIFT INSTALLATION

Tasman Chilled's new Pulsor 500 refrigeration unit, combined with a Dhollandia tail lift, ensures reliable cooling and efficient loading for their fleet. This build supports their commitment to keeping goods fresh and operations smooth.

WEATHERELL TRANSPORT FLEET UPGRADE

Weatherell Transport's Lynx upgrade project is well underway, ensuring their fleet remains at the cutting edge of efficiency and performance. These enhancements will optimise reliability, fuel efficiency, and overall operational effectiveness, keeping Weatherell Transport at the forefront of the industry. Stay tuned for more updates as the project progresses!

NASH JACK ROLLS OUT WITH XARIOS 6

Nash Jack's latest unit is on the road featuring the efficient and compact Carrier Xarios 6. A great solution for chilled deliveries, the Xarios 6 offers reliable performance and easy installation for light commercial vehicles.

PULSOR POWER FOR CAL ISUZU

Two new Cal Isuzu trucks have just been fitted with Carrier Pulsor 500 units—perfect for high-performance temperature control on urban delivery routes. Built for frequent stops and starts, these units are made to keep up with busy city logistics.

MARTIN BROWER INSTALLS UNDERWAY

Martin Brower's fleet expansion has kicked off with five Supra 1250MT refrigeration units and LM30 Dholandia tail lifts. These heavy-duty solutions are ideal for large-volume food service distribution, delivering reliability and ease of use for the driver.
